

# EcoForum Conference & Exhibition 2010

23 & 24 February 2010 • Australian Technology Park, Sydney

REMEDICATION · WATER · CLIMATE CHANGE · WASTE

The Australian Land & Groundwater Association (ALGA) brings people with like interests together to network, build capacity, exchange ideas and further the science and technology surrounding the prevention, assessment and remediation of contaminated land and groundwater in Australia. For both individuals and companies, ALGA membership is the best way to stay connected with other individuals and companies operating in the contamination remediation sector. Become a member or sponsor today.

Aurecon provides a wide range of engineering, design, planning and advisory services to a varied client base. We have over 6,000 staff with 87 different offices worldwide and are active in the transport, energy, mining and industrial, water, property and community development sectors. The environmental services we provide range from assessing and managing the impact of major projects, through designing remediation schemes, to conservation and natural resource management. Our approach includes assessing sustainability and environmental risks and implementing environmental auditing and monitoring systems.

Coffey Environments provides a wide range of technical consulting services to transform environmental, social and safety expenditure into investment. We specialise in the design and implementation of site remediation systems. We know that establishing practicable remediation targets with all stakeholders is critical to maximising project value for site owners and ensuring remedial goals are reached cost-effectively. Coffey Environments experiences span engineering, physical, chemical, biological and thermal remedial techniques.

The International WaterCentre (IWC) provides education and training, applied research and expert services to promote a whole-of-water cycle approach and develop capacity in integrated water management around the world. A joint venture of four leading Australian universities - The University of Queensland, Griffith University, Monash University and The University of Western Australia - with national and international knowledge networks, the IWC provides a breadth of expertise and experience rarely found in a single organisation. The IWC's partners are the South East Queensland Healthy Waterways Partnership and the International Riverfoundation, and it is supported by the Queensland Government.
